PROFESSIONAL SUMMARY

Quality-focused website developer and QA specialist with experience in WordPress and Elementor development, finance mobile and web testing, Maestro automation, UI/UX evaluation, technical SEO, and client website support. Combines development and testing skills to build reliable digital experiences, identify usability issues, and improve websites for users and businesses.

PROFESSIONAL EXPERIENCE

Quality Assurance Tester (Part-time) Nov 2025 - Present

HeyPenny | Part-time

- Test the Penny finance mobile application and web platform across functional, regression, responsive, and UI/UX scenarios.
- Create repeatable Maestro automation flows for key finance workflows and maintain structured test coverage.
- Document defects with clear reproduction steps and review navigation, consistency, and user friction across releases.

Website Developer, QA & SEO Specialist Jan 2024 - Apr 2024

GodesQ Digital Marketing Services

- Develop and maintain client websites with WordPress and Elementor, contribute to Shopify updates, and troubleshoot frontend issues.
- Perform functional, responsive, UI/UX, and performance QA for client websites and digital experiences.
- Support technical and on-page SEO with Semrush, including site audits, keyword checks, issue diagnosis, and content recommendations.
- Handle client work for Bemunchie and Freedom Family Investments, alongside projects including Maria and I, Go To SHOUT, and ProAge Beauty.

SELECTED PROJECTS

QA Desk 2026

Personal Project

- Built a QA task-management and tracking workspace for Penny mobile and web testing, organizing checks, bug reports, and completion history.

Neko Food House POS & Inventory System 2023 - 2024

Team Capstone

- Contributed to C# development, UI/UX design, and debugging for a computerized sales and inventory system.
- Supported sales and inventory workflows, automated reporting, inventory alerts, and light/dark login themes as part of the capstone team.
